Cermak

Pioneers in the Plastic Tile Industry

Cermak for lasting beauty that's true econo

the Premium Plastic Wall Tile

Nineteen field tile colors plus eight harmonious trim colors provide complete selection for any decorative scheme. The rich, lustrous beauty of Cermak tiles is lasting. Solid color extends clear through every tile. There is nothing to chip off, peel or craze.

Exclusive undergate injection moulding makes every tile stronger, results in better marbleization. Only with undergated tiles can you be sure of edges unmarred by troublesome gate burrs.

Cermak bevel-edge tiles can be installed on any clean, dry, smooth, sound structure. No expensive alterations are necessary! Cracked, pitted or uneven walls should be repaired or covered with wall board before tile installation.

Cermak tiles made from Polystyrene will not absorb water. They are ideal for use in bathrooms, kitchens, laundries, recreation rooms, stores, schools and plants. Their lifetime beauty stays sparkling clean with minimum attention.

Undergate—*the mark of Premium Quality . . .*

a Cermak exclusive

Plastic enters bottom of die cavity giving the truest, smoothest edges ever moulded.

Look for the raised "Undergate" patent plug—it is your guarantee of superior quality. Cermak's exclusive centrifugal casting principle improves granular structure making every Cermak tile stronger. Marbleization is smoother, more symmetrical. There can be no troublesome gate burrs. Edge blemishes cannot develop. Flush installations are easy with Cermak's true, deep edges.

11 Cermak Tiles give you wide design and trim selection

Our complete set of outside corner tiles makes every installation more attractive—makes every installation easier, faster. Use the new Bullnose Corner Cap Tiles, available for either right or left hand returns, for a truly finished appearance.
